PROFILE SUMMARY

I am an Oceanography graduate with professional experience in data analysis, research-oriented analytical work, and strategic decision-making. I have hands-on skills in R, Python, MATLAB, statistical analysis, data visualization, GIS, and spatial analysis, along with experience working with environmental and geospatial data. My academic background in oceanography has developed my ability to analyze complex datasets, interpret scientific information, and communicate findings effectively. I also have professional experience in business and market analytics, performance tracking, reporting, and digital tools, providing a multidisciplinary perspective that combines scientific analysis, data interpretation, and practical problem-solving.
